| Course Schedule | Tuesdays, 12:00pm-2:50pm |
| Office Hours | Langmead: by appointment Beaton: by appointment Mattock: by appointment |

Scheduling Notes

The Spring 2013 academic term runs from January 7-April 27. Classes end April 19. Spring Recess is the week of March 10-17. No classes will be held during that week.

Course Overview and Goals

This course explores both the production and the preservation of digital culture in the context of the United States. It begins by tracing the computerization of American life over the second half of the twentieth century, looking at how actors in the past understood digital technologies and their future possibilities in a wide variety of contexts. How did scientists, bankers, government workers, business managers, filmmakers, urban planners, librarians, archivists, and the like make sense of, and explain to themselves, the growing role of digital technologies within American society? How did technological changes in professional arenas spill into the domestic realm and change interpersonal relations? And, for our current-day purposes, what are the physical remains—whether hardware, software or media-based—that we can expect to have survived into the present from these entanglements with technology? As the United States underwent its transformation into an information-intensive economy, what are the persistent representations of information culture that remain for us to preserve today? What unique problems do these forms and formats present to archivists and related information professionals? What are the tools that information professionals use to maintain digital objects over the long term?

With these questions as our starting point, this course offers a historical and theoretical framework for understanding the preservation of digital culture, including both digitized and born-digital materials. As our exploration moves toward the present day, we encounter contemporary information management problems and solutions—solutions that must also take into consideration the technological shifts that took place over the previous seventy years. Mastering the latest research on the preservation problems surrounding digital technology is

the goal of the course. Along the way, this course tackles the ongoing debates focused on the related but distinct concepts of preservation, curation, maintenance, and stewardship.

Course Requirements

| <i>Assignment</i> | <i>% of Final Grade</i> | <i>Due Date</i> |
|--|-------------------------|--|
| Position Paper (Policy Audience) | 25% | March 12 th , noon EST |
| Public Service Announcement (Lay Audience) | 25% | March 26 th , noon EST |
| Report to Jefferson (Professional Audience) | 25% | April 16 th , noon EST |
| SWG participation | 25% | Ongoing, with a group assessment report due on April 23 rd , noon EST |

Student Working Groups (SWG's)

Every student will be assigned into a working group at the start of the term. Each working group will focus on a major theme running through the LIS 2674 course material. The purpose of these working groups is to simulate the topic- and problem-specific project teams commonly used to conduct research and produce deliverables within the information professions. Each class session will feature a discussion component. In some weeks, the entire class will engage in discussion as a single body. In other weeks, students will meet with their SWG. In still other weeks, the SWG's will be intermixed to facilitate cross-topic discussions. The following areas of focus have been chosen for Spring 2013:

- Workplace Transformations
- Interpersonal Communication
- Efficiencies and Expenses
- Makers and Users
- Boosterism and Alarmism

Active participation in your assigned SWG will form the basis for your course participation grade. You should read and critically analyze all assigned course materials before coming to class, arrive prepared to report to your fellow students, and work over the duration of the term to develop a unique expertise in your SWG subject area. **At the end of the semester, you are also required to submit a 250-500 word statement that uses professional and collegial prose to identify the strongest and/or most valuable individual member and the weakest and/or least valuable individual member of your SWG, explaining the rationale behind your choices.** The purpose of this exercise is to simulate peer review and performance evaluation. These statements will inform the instructor's evaluation of your individual classroom performance but will not serve as the sole criteria for the grade.

Assignments

LIS2674 has three major assignments. The assignments are designed to develop your skills in communicating with distinct and various audiences.

Assignment 1: Position Paper (Policy audience)

In October 2012, the Pittsburgh City Council approved a plan to create a City Archives Commission (<http://pittsburghpa.gov/district7/archivinglegislation>). In 1000-1250 words, write a position paper for the Commission that advocates for the creation of a citywide digital preservation strategy. In the paper, you will need to explain to the best of your ability the scope of the city's digital records, educate your audience of policymakers and government officials about the types of digital materials that a city such as Pittsburgh generated in the past and creates in the present, outline the preservation issues associated with digital materials, identify any salient recordkeeping legislation that might affect a citywide digital preservation strategy, and argue why long-term access to digital materials should be a primary concern for local government. If you have not previously written a position paper and require further information about best practices, numerous online resources can be located via Google or ULS. The paper must be written in polished and professional prose. Please note the following: this is not a research paper, an implementation plan, an Op-Ed, or a philosophical monologue. It is an opportunity for you to produce a broad overview of digital preservation geared toward an audience that is interested in what you have to say but not particularly knowledgeable about the specifics. You should aim to consult no fewer than 10 sources.

Assignment 2: Public Service Announcement, "Obsolescence and You" (Lay audience)

Building on your research in Assignment 1, create a web-based presentation lasting no more than 4 minutes that explains to the residents of Pittsburgh why the city should have a digital preservation strategy and outlines the benefits of having long-term access to the city's digital materials. In this presentation, you should use the larger history of digital culture as presented in class to teach your audience about the concept of obsolescence and how it relates to digital preservation. If you have not previously created a web-based presentation, such as a web-based video, slideshow or webinar, numerous online resources can be located via Google or ULS. It must be posted on the open web (YouTube, Vimeo, Tumblr and such are all fine, Facebook and other member-restricted sites are not). You will submit the link on CourseWeb by the stated due date.

Assignment 3: Formal Presentation (Professional audience)

The last three weeks of the course will involve a series of labs designed by Jefferson Bailey, who is currently the Strategic Initiatives Manager at the Metropolitan New York Library Council (METRO), has worked on digital stewardship projects at numerous institutions, and is a graduate of the MLIS program at the University of Pittsburgh's SIS. In Assignment 3, each SWG will be required to give one 20-minute formal presentation geared for a professional audience. Each SWG will choose a tool or activity discussed or demonstrated during the Week 12-14 lecture and labs, relate it to their SWG's theme and be required to: utilize key terminology to explain what this tool or activity accomplishes on both a practical and theoretical level; articulate the role this tool or activity plays in the broader goal of digital stewardship; suggest possible implementation scenarios (including infrastructure, staff, or training requirements) for introducing this tool or activity into a digital stewardship workflow; and explain any strengths or weakness of the tool or activity and the challenges it may impose if implemented. The SWG presentations are welcome to reference existing manuals, guides, or case studies of these tools or activities and are also welcome to create their own websites, blogs, or tutorials if creating such supplemental resources facilitates group work or strengthens the presentation. These supplemental resources are not required, but should be referenced and discussed as part of the presentation if they are created. SWG's can create hypothetical scenarios, collections, and/or user groups for their

presentations. Each SWG member will be expected either to speak during part of the presentation or to have clearly authored/created one of the supplemental resources. This assignment is an opportunity both to learn the details of a specific, everyday digital preservation tool or activity and to explicate how it accomplishes, embodies, and potentially complicates everything else you have learned this semester about digital information.

Style Guide and Formatting Requirements

Use of *The Chicago Manual of Style*, 16th edition (Notes and Bibliography Style) is *mandatory* for *footnotes* and bibliographies. While you are strongly urged to purchase a copy of this work, an online version is available at <http://www.chicagomanualofstyle.org/home.html>. Line spacing can be line-and-a-half or double-spaced. Fonts used should be no smaller than 10 point and no larger than 12 point. Footnotes should be used rather than endnotes. The use of *Ibid.* and parenthetical inline references will not be accepted.

Grading Rubric for Written Work

A (4.0): Exceptional work.

Demonstrates an outstanding understanding--both theoretical and factual--of the materials both presented in class and assigned out of class. Displays original and creative thought that significantly exceeds expectations. Shows perfect command of English grammar and syntax. Exhibits a publishable and masterful use of sources while working exclusively within the assigned citation style.

A- (3.7): Outstanding work.

Demonstrates comprehensive knowledge of the course materials both presented in class and assigned out of class. Greatly surpasses course expectations by not only displaying skillful treatment of the assigned material but also contributing substantial originality to the work. Shows superior command of English grammar and syntax. Uses an expert approach to source work while functioning exclusively within the assigned citation style.

B+ (3.3): Very good work.

Demonstrates a better-than-average command of the course materials both presented in class and assigned out of class. Exceeds course expectations by revealing original ideas and by showing a solid grasp of English grammar and syntax. Uses sources well and with some creativity. Shows thorough understanding of the assigned citation style.

B (3.0): Solid work.

Demonstrates expected command of the course materials both presented in class and assigned out of class. Meets course expectations by following the assignments, using sources in an acceptable manner and using the assigned citation style.

B- (2.7): Marginal work.

Demonstrates an incomplete understanding of the course materials both presented in class and assigned out of class. Does not meet course expectations by inadequately following the assignment, showing an insufficient grasp of English grammar and syntax, by displaying a lower-than-average approach to source work and misunderstanding the assigned citation style.

C (2.0): Unacceptable work in an MLIS graduate program.

Fails to meet expectations by not following the assignment, using sources inappropriately, misunderstanding the required citation format and displays a poor command of English grammar and syntax.

F (0.0): Failing work.

Class Policies

Academic Integrity

Students in this class will be expected to comply with the University of Pittsburgh's Policy on Academic Integrity. Any student suspected of violating this obligation for any reason during the semester will be required to participate in the procedural process, initiated at the instructor level, as outlined in the University Guidelines on Academic Integrity. See <http://www.provost.pitt.edu/info/ai1.html> for full policies regarding academic integrity.

Students with Disabilities

If you have a disability which you are or may be requesting an accommodation, you are encouraged to contact both your instructor and Disability Resources and Services, 216 William Pitt Union, 412-648-7890 or 412-383-7355 (TTY), as early as possible in the term. DRS will verify your disability and determine reasonable accommodations for this course. For more information on the services of that office, see <http://www.drs.pitt.edu>.

Assignment Deadlines

All assignments are to be submitted to CourseWeb, using the Assignment Tool, and are due by noon, EST, on the due date. Managing deadlines is an important professional skill.

Incompletes

Incomplete grades will not be given for this course unless the instructors are notified at least two weeks in advance of the end of the term of serious circumstances affecting a student's ability to complete the course requirements by the assigned dates. If an incomplete is granted, all outstanding assignments must be turned into the instructors by a date to be determined by the instructors, typically a month following the end of the term for which the incomplete was granted.
